

## Detective and Forensic Science Week at Stanton Academy

Starting this fall, Stanton Academy's Criminal Justice Program will be welcoming 12 bright and curious thinkers to participate in our hands-on and active week-long certificate program. If you love mystery, science, using your brain and working with your hands, this program is for you!

### Think Like a Detective

You will visit mock crime scenes where you will learn how to find and collect evidence, make observations, and question witnesses. You'll learn how to analyze facts and evidence to solve crimes, keeping your city safe.

### Work Like a Forensic Scientist

In Stanton Academy's Criminal Justice program, you will learn about the different kinds of forensic scientists and how their work helps to solve crimes. Throughout the week, you will learn important skills and techniques while you work as a forensic scientist to solve crimes.

### Solve Crimes

Once you have developed your skills, use all of your training to assist your Lead Detective and your Lead Forensic Scientist in getting to the bottom of some unsolved cases such as The Case of the Kidnapped Kitten, The Case of the Missing Millions, and The Case

of Bloodstained Baked Goods. At the end of your training week, you will receive a certificate as a graduate of the Stanton Academy Criminal Justice Program.

This program is open to trainees between the ages of 7 and 11 who are bright, gifted, or twice-exceptional. You are likely to enjoy this training if you enjoy puzzles, like to dig for answers, are observant, and are willing to do work that involves following instructions and using professional equipment. It's very important that you are able to work together with other detectives and scientists because teamwork is required to solve crimes. All trainees must be able to read, though strong writing skills are not required at this time.

We are currently accepting 12 trainees to work with our Lead Detective and Lead Forensic Scientist for this year's training program. If this training program is for you, we welcome you to register at the following link: <https://tinyurl.com/criminaljusticeteam>

Important details:

Monday, October 21 - Friday, October 26

9:00 am - 4:00 pm. Early arrival available for a limited number of trainees.

4 Stanton Place, London ON

Registration: \$236.67 (includes all materials for all training and cases)

Learning about forensic science and detection will be an unforgettable experience for our trainees. We look forward to you joining us!
